

§ 294.22

(4) Habitat for threatened, endangered, proposed, candidate, and sensitive species, and for those species dependent on large, undisturbed areas of land;

(5) Primitive, semi-primitive non-motorized, and semi-primitive motorized classes of dispersed recreation;

(6) Reference landscapes;

(7) Natural appearing landscapes with high scenic quality;

(8) Traditional cultural properties and sacred sites; and

(9) Other locally identified unique characteristics.

Substantially altered portion: An area within an Idaho Roadless Area where past road construction, timber cutting, or other uses have materially diminished the area's roadless characteristics.

Temporary road: As defined at 36 CFR 212.1, the term means a road necessary for emergency operations or authorized by contract, permit, lease, or other written authorization that is not a forest road and that is not included in a forest transportation atlas. Temporary roads are available for administrative use until decommissioned.

Uncharacteristic wildland fire effects: An increase in wildland fire size, severity, and resistance to control; and the associated impact on people, property, and fire fighter safety compared to that which occurred in the native system.

§ 294.22 Idaho Roadless Areas.

(a) *Designations.* All National Forest System lands within the State of Idaho listed in § 294.29 are hereby designated as Idaho Roadless Areas.

(b) *Management classifications.* Management classifications for Idaho Roadless Areas express a management continuum. The following management classifications are established:

(1) Wild Land Recreation;

(2) Special Areas of Historic or Tribal Significance;

(3) Primitive;

(4) Backcountry/Restoration; and

(5) General Forest, Rangeland, and Grassland.

(c) *Maps.* The Chief shall maintain and make available to the public a map of each Idaho Roadless Area, including records regarding any corrections or

36 CFR Ch. II (7–1–12 Edition)

modifications of such maps pursuant to § 294.27.

(d) Activities in Idaho Roadless Areas shall be consistent with the applicable management classification listed for each area under § 294.29.

§ 294.23 Road construction and reconstruction in Idaho Roadless Areas.

(a) *Wild Land Recreation, Special Areas of Historic or Tribal Significance, or Primitive.* Road construction and reconstruction are prohibited in Idaho Roadless Areas designated as Wild Land Recreation, Special Areas of Historic or Tribal Significance, or Primitive. However, the Regional Forester may authorize a road to be constructed or reconstructed in an area designated as Wild Land Recreation, Special Area of Historic or Tribal Significance, or Primitive if pursuant to statute, treaty, reserved or outstanding rights, or other legal duty of the United States.

(b) *Backcountry/Restoration.* (1) Road construction and reconstruction are only permissible in Idaho Roadless Areas designated as Backcountry/Restoration where the Regional Forester determines:

(i) A road is needed to protect public health and safety in cases of an imminent threat of flood, wildland fire, or other catastrophic event that, without intervention, would cause the loss of life or property;

(ii) A road is needed to conduct a response action under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) or to conduct a natural resource restoration action under CERCLA, section 311 of the Clean Water Act, or the Oil Pollution Act;

(iii) A road is needed pursuant to statute, treaty, reserved or outstanding rights, or other legal duty of the United States;

(iv) A road realignment is needed to prevent irreparable resource damage that arises from the design, location, use, or deterioration of a road and cannot be mitigated by road maintenance. Road realignment may occur under this subsection only if the road is deemed essential for public or private access, natural resource management, or public health and safety;

(v) Road reconstruction is needed to implement a road safety improvement project on a road determined to be hazardous based on accident experience or accident potential on that road; or

(vi) The Secretary of Agriculture determines that a Federal Aid Highway project, authorized pursuant to Title 23 of the United States Code, is in the public interest or is consistent with the purpose for which the land was reserved or acquired and no other reasonable and prudent alternative exists.

(2) A responsible official may authorize temporary road construction or road reconstruction for community protection zone activities pursuant to § 294.24(c)(1)(i) if in the official's judgment the community protection objectives cannot be reasonably accomplished without a temporary road.

(3) The Regional Forester may approve temporary road construction or road reconstruction to reduce hazardous fuel conditions outside a community protection zone where in the Regional Forester's judgment the circumstances set out below exist. Temporary road construction or road reconstruction to reduce hazardous fuel conditions under this provision will be dependent on forest type and is expected to be infrequent.

(i) There is a significant risk that a wildland fire disturbance event could adversely affect an at-risk community or municipal water supply system pursuant to § 294.24(c)(1)(ii). A significant risk exists where the history of fire occurrence, and fire hazard and risk, indicate a serious likelihood that a wildland fire disturbance event would present a high risk of threat to an at-risk community or municipal water supply system.

(ii) The activity cannot be reasonably accomplished without a temporary road.

(iii) The activity will maintain or improve one or more roadless characteristics over the long-term.

(c) *General Forest, Rangeland, and Grassland.* (1) A forest road may be constructed or reconstructed or a temporary road may be constructed in Idaho Roadless Areas designated as General Forest, Rangeland, and Grassland, unless prohibited in § 294.25(e).

(2) Forest roads constructed or reconstructed pursuant to § 294.23(c)(1) must be conducted in a way that minimizes effects on surface resources and must be consistent with land management plan components as provided for in § 294.28(d).

(d) *Temporary roads.* (1) Temporary road construction must be conducted in a way that minimizes effects on surface resources, is consistent with land management plan components as provided for in § 294.28(d), and may only be used for the specified purpose(s).

(2) Temporary roads must be decommissioned upon completion of the project or expiration of the contract or permit, whichever is sooner. A road decommissioning provision will be required in all such contracts or permits and may not be waived.

(e) *Road maintenance.* Maintenance of temporary and forest roads is permissible in Idaho Roadless Areas.

(f) *Roads associated with mineral activities.* Road construction or reconstruction associated with mineral activities is provided for in § 294.25.

§ 294.24 Timber cutting, sale, or removal in Idaho Roadless Areas.

(a) *Wild Land Recreation.* The cutting, sale, or removal of timber is prohibited in Idaho Roadless Areas designated as Wild Land Recreation under this subpart, except:

(1) For personal or administrative use, as provided for in 36 CFR part 223; or

(2) Where incidental to the implementation of a management activity not otherwise prohibited by this subpart.

(b) *Special Areas of Historic or Tribal Significance and Primitive.* (1) The cutting, sale, or removal of timber is prohibited in Idaho Roadless Areas designated as a Special Area of Historic or Tribal Significance or as Primitive under this subpart, except:

(i) To improve threatened, endangered, proposed, or sensitive species habitat;

(ii) To maintain or restore the characteristics of ecosystem composition, structure, and processes;

(iii) To reduce the risk of uncharacteristic wildland fire effects
